

Virgo Horizontal Shower

SUSSEX

Product code

VGHS

Install Preparation:

- Ensure all parts are accounted for.
- A flow controller has been incorporated within the shower head, care is to be taken during installation not to damage the flow controller when fitting the shower.
- This shower is suitable for High Pressure applications. This shower may not be suitable for use with Gravity-fed water heaters, low and unequal pressure supply networks.

Fit Off:

- Flush water lines prior to fitting the shower.
- Ensure the wall penetration is sealed prior to connecting any fittings.
- Apply thread tape or appropriate sealant to 1/2" BSP Water Feed's thread.
- Place dress ring over Water Feed thread and fit the Shower Arm.
- Spin on Shower Head, use a spanner to tighten. Ensure the rubber washer is seated properly.
- To complete the installation, test shower flow and check for any leaks.

Plumbers note:

- Shower is to be installed by a Licensed Plumber in accordance with AS/NZS 3500:2021
- Recommended working water pressure 300 - 500 Kpa. Maximum water temperature is 65°C
- After installation, ensure that shower functions correctly without leaks.
- Please ensure a copy of the Installation Instructions are left with the end user for future reference.
